Our Shop By Appointment
24901 Hidden Valley Rd
Philomath, OR 97370

Laser Engraving

Our Legend 30 Watt laser engraver can engrave items up to 32x20in. We can engrave wood, plastics, glass, acrylic, painted brass, and many others. We can also cut wood, acrylic, and plastics up to 1/4" thick.

We keep a supply of thin hardwoods in stock for cutting ornaments, and can order many other materials.

We will gladly engrave items supplied by the customer also. Rate: \$30/hr

Awards

We supply a full line of awards and trophies. We can order from the same suppliers as the engraving shops in town, or create custom items in our shop, or have custom items made through the Myrtlewood Gallery in Philomath.

For quick turn around we stock cherry plaques in a number of sizes, our hand made hardwood pens, and a variety of Acrylic awards.

Fast turn around, and competitive pricing sets us apart from our competition. We often layout and engrave awards while the customer watches.

Pricing:
Retail Shop Awards(Victory and JDS)
-Retail + free engraving.
Custom Awards - Bid.

Hidden Valley Laser Craft CUSTOM Services

We specialize in custom jobs using computer controlled cutting and engraving. Wood is our specialty, but we can process many other materials.

We take artwork in almost any format including:

- simple verbal instructions
- paper sketch
- printed designs
- most computer files

We convert the customers artwork into a CorelDRAW file which we can then print, or generate a preview image file which we email for approval.

Your artwork or design can then be realized on any of the following media:

- Laser Engraved Plaques and Awards
- Laser Cut Wood/Plastic
- Routed Wood
- Vinyl Banners, Signs or Stickers

Milling

We mill logs, and re-saw lumber up to 20" wide and 16' long. Milling is done on weekends and usually with the customer helping and guiding what they want done. Small jobs are welcome. Rate: \$30/hr

Computerized Routing

Our CNC router can handle items in a single run up to 48"x96"x7" tall. Items longer than 96" can be cut in multiple runs. Cutting is done using a Porter Cable 5hp variable speed router. Any material that can be cut with a router can be processed. This machine is great for outdoor signs.

We keep redwood, and a selection of natural edged wood blanks for outdoor signs. We can also make glued up sign blanks to your specs. Rate: \$30/hr

Vinyl Signs

With our vinyl cutter we can create a number of sign products including: Signs on steel or aluminum, Banners, Stencils, and vinyl artwork to be applied by the customer.

Rate: Bids, 10%-20% below local dealers

Sanding

We sand using a dual drum Performax 36" drum sander. Abrasive planing is done with 36 grit. Sanding is done using 60 and 100 grit. Great for glue ups, table tops, and other rough lumber free of metal. Customer help is welcome and reduces time/cost. Rate: \$30/hr
